R³ NORDIC

Symposium and Exhibition

Copenhagen • 2012

The Future Hospital- and Pharma

The Ideal "Green" Facility and how to get there

NEW!

R3 Nordic hosts both a Hospital and Pharma Seminar Track

The Danish program committee invites you to participate in the annual symposium and exhibition May 14-15th, 2012 at **Crowne Plaza Copenhagen Towers** located in the newly build Ørestaden, just 5 minutes drive from Copenhagen Airport. Ørestaden is a brand new architectural part of the city.

There is today a rapid development within medical- and pharmaceutical companies and new giant Hospitals in this region combining Denmark and Sweden. Its epicentre is Copenhagen and surroundings, also known as the “Medicon Valley”.

We have put together an interesting program covering one of the most discussed issues in the Clean room industry today:

Energy saving technologies within the clean rooms with a specific focus on the pharmaceutical industry and the forthcoming investments in new hospitals.

We will also cover current- and future regulations, design, construction and user ergonomics.

Updated program and abstracts will be available on www.r3nordic.com.

The other important part of the event is as usual the inspiring exhibition where you can meet the suppliers of equipment and services for the business.

The symposium will update your professional knowledge, give you new future inspiration and allow you the opportunity to network with R3 colleagues and friends.

We look forward to see you in Ørestaden, Copenhagen Denmark!
